NOTES

- J1 consists of 3x 20-pin headers mounted on underside of PCB. Headers mount into mating sockets, so must be vertical.
- Various solder jumpers on PCB are set by the provided stencil file (solder paste will short SJ that should be shorted).
- Two additional 4-pin headers not shown are mounted from top side.
- The 'fix' on DB9 connector (J2) is not required -02 build.
- U1 has two possible part numbers depending on variant.
